Christophe MONTI

Senior .Net Developer · AI · AppSec | Freelance

hello@monti-it.io monti-it.io +33 6 65 16 41 36

PROFILE

I modernize critical .Net applications and help teams ship faster without sacrificing quality, closing vulnerabilities before production. AI agents write the code under my direction: I frame the work, review it and own the result, with an application security approach (DevSecOps: security gates built into CI/CD, security-focused code review, secured AI features). Senior .Net FullStack developer with 21 years of experience in industrial refrigeration, telemedicine, transport and logistics.

TECHNICAL SKILLS

- C#, .Net Core, ASP.NET Core, Web API
- Angular, React, TypeScript, JavaScript, Bootstrap
- SQL Server, T-SQL, PostgreSQL
- Azure DevOps, Git, CI/CD, YAML, Docker, Kubernetes, Trivy, Dependabot
- SOLID, KISS, Clean Code, REST, Microservices

SOFT SKILLS

- Technical leadership & team management
- Clear communication & making technical topics accessible
- Autonomy & collaboration
- Analysis & problem solving
- Technical mentoring and coaching

NOTABLE EXPERIENCE

Since 2022 — **CLAUGER (Industrial refrigeration) – Brignais (69)**

Modernization of an industrial platform that turns sensor data into value, CI/CD setup on Azure DevOps, improved software quality and security (auth, logs, cache, DMS, i18n, audit trail…). DevSecOps approach: SonarQube quality gates in the Azure DevOps CI/CD, OWASP-driven secure coding and authentication hardening (OpenID Connect, JWT).

Results: Expanded DataViz capabilities, Automated deployments, Reduced technical debt.

Environment: .Net Core, C#, ASP.NET Core, Angular, SQL Server, Kubernetes

2016 – 2019 — **DEEPLINK MEDICAL (Telemedicine) – Lyon (69)**

Feature development in an HDS (health data hosting) environment for overnight emergency teleradiology, on critical applications with strong performance and responsiveness constraints: creation of cross-cutting modules (DMS, audit trail, i18n…), performance optimization and application stabilization. DevSecOps approach: security gates built into CI/CD, OWASP-driven secure coding and HDS compliance technical controls.

Results: Improved medical response.

Environment: .Net, ASP.NET MVC, SQL Server, JavaScript, Git, OWASP

2007 – 2011 — **SNCF (Rail traffic) – Lyon (69)**

Development of critical n-tier applications, data flow integration, technical team coordination.

Results: Improved rail occupancy planning.

Environment: .Net, C#, SQL Server, TFS

EDUCATION

- 2025: Kubernetes training – PLB
- 2021: Angular training – SkillSoft
- 2006: .Net C# training – Global Knowledge
- 2004: Master's degree in Computer Science – Université de Nantes

LANGUAGES

- French: Native language
- English: Professional / Technical

CAREER HISTORY

Since 03/2022 — **Clauger**: industrial refrigeration - Brignais (69)

Freelance

Project: MyClauger3E - 20 people

Tasks:

- Requirements design and development
- Architecture maintenance and evolution (logging, cache, IoC, OpenID Connect,…)
- Continuous integration and continuous deployment setup
- Process harmonization
- DevSecOps approach: SonarQube quality gates in the CI/CD, OWASP, authentication hardening (OpenID Connect, JWT)
- Leading part of the team

Environment: .Net Core 10, C#, ASP.Net Core, Web API, Angular 19, HTML5, CSS3, Bootstrap, Linq, Visual Studio 2019, SQL Server 2017, Azure Dev Ops, Git, NuGet, NFluent, Windows 10, Scrum, Yaml, Kubernetes, Data Api Builder, OWASP, SonarQube, OpenID Connect, JWT, Application Insights, Microsoft Copilot

03/2020 - 03/2022 — **Hospices Civils de Lyon**: telemedicine solution - Lyon (69)

Software engineer, ECONOCOM - 2 years

Project: ViaPatient / Mocas - 14 people

Tasks:

- Time-and-materials then service-center delivery, integrating 5 other modules of the Easily suite
- Technical lead
- Requirements design and development
- Architecture maintenance and evolution (logging, cache, IoC…)
- Continuous integration and continuous deployment setup
- DevSecOps approach: security gates built into CI/CD, HDS compliance technical controls
- Process harmonization

Environment: .Net 4.7, C#, ASP.Net MVC, Web API, Angular JS, WebForms, WCF, WPF, HTML5, CSS3, Bootstrap, jQuery, Linq, Service NT, Visual Studio 2019, SQL Server 2017, Azure Dev Ops, Git, NuGet, NFluent, Windows 10, Scrum

12/2019 - 02/2020 — **Addactis**: insurance risk management - Lyon (69)

Software engineer - 3 months

Project: Platform - 13 people

Environment: .Net Core 2.2, C#, Angular 8, ASP.Net, HTML5, CSS3, Bootstrap, jQuery, Linq, Web Services, Visual Studio 2019, SQL Server 2016, GitLab, Docker, NuGet, SDK Visual Studio, Windows 10, Scrum

08/2016 - 11/2019 — **DEEPLINK MEDICAL**: telemedicine solution - Lyon (69)

Software engineer - ~3 years

Project: ITIS/MIRIO - 37 people

Tasks:

- Requirements design and development for the various clients
- Architecture maintenance and evolution
- Collaboration with the teams on technical and functional topics
- Cross-cutting tools (DMS, audit trail, i18n…)
- DevSecOps approach: security gates built into CI/CD, OWASP-driven secure coding, HDS compliance technical controls
- PMSI evolution by structuring medical data and using it in our dedicated BI tool

Environment: .Net 4.7, C#, ASP.Net MVC, HTML5, CSS3, Bootstrap, jQuery, Linq, Web Services, Visual Studio 2019, SQL Server 2016, Git, Visual Studio Online, NuGet, SDK Visual Studio, NDepend, Windows 10, Scrum, OWASP

10/2013 - 07/2016 **ACS/Xerox**: public transport e-ticketing - Guilherand (07)

Team lead / Software engineer, OBJET DIRECT - ~3 years

Project: ATLAS remote sales website - 14 people

Tasks:

- Managing a team of 4 developers using Agile methods
- Requirements design and development for a Belgian client
- Architecture maintenance and evolution (all clients)
- Collaboration with the team on technical and functional topics

Environment: .Net 4.5, C#, ASP.Net WebForms&MVC, HTML5, CSS3, jQuery, Linq, MEF, Web Services, Visual Studio 2015, Oracle 11g, Git, Visual Studio Online, NuGet, SDK Visual Studio, NUnit, Windows 7, Scrum, e-commerce, XSLT, WPF

09/2013 - 09/2013 **OBJET DIRECT**: IT services company - Lyon (69)

Software engineer - 1 month

Project: Project Customization Tool - 1 person

Tasks:

- Technical lead
- Building a Visual Studio plug-in
- Development of various compliance rules
- Continuous integration rollout on the TFS Azure platform

Environment: .Net 4.5, C#, Linq, Visual Studio Team System 2013, TFS Azure, SDK Visual Studio, Windows 7, Agile, Entity Framework

10/2012 - 08/2013 **BA Systemes**: industrial logistics - Mordelles (35)

Solutions integrator, CELAD - 11 months

Project: MACtac Belgium - 3 people; Krones JFA Germany (English-speaking) - 2 people; Système U France - 2 people; Lactalis Spain - 3 people

Tasks:

- Client requirements specification
- Integration platform setup
- Strategy algorithm development (SQL)
- Project go-live at the client site
- Data analysis tool development (.Net)

Environment: SQL, SQL Server 2008, AGV Manager, Windows 7/2008, Modelio, Mantis, .Net 4.0, C#, WPF, Linq, Entity Framework, Visual Studio 2010

09/2011 - 06/2012 **Ibelem**: software publisher - Nantes (44)

Software engineer - 10 months

Project: PushManager - 7 people

Tasks:

- Design and development of PushManager server features
- Technical feasibility studies for new PushManager features
- Improving the TFS platform to reach true continuous integration and better tracking of development scenarios and tasks

Environment: .Net 3.5, C#, ASP.Net, SQL, WCF, Linq, Visual Studio Team System 2008 (Team suite & TFS), SQL Server 2008, Windows Server 2003, Windows 7

10/2010 - 08/2011 **SNCF**: rail traffic - Lyon (69)

Team lead / Architect / Designer / Developer, SOGETI - 11 months

Project: SIERRA - 10 people

Tasks:

- Managing a team of 5 developers and distributing tasks
- Development of stored procedures, business services and UIs on an n-tier architecture
- Assigning and tracking the development team's tasks
- Application maintenance and evolution
- Collaboration with the team on technical and functional topics

Environment: .Net 3.0, C#, WinForms, SQL, WCF, Visual Studio Team System 2005 (Team suite & TFS), SQL Server 2005, Windows Server 2003, Windows XP, Quality Center

04/2010 - 09/2010 **SNCF**: rail traffic - Lyon (69)
Designer / Developer, SOGETI - 6 months
Project: CONCERTO - 32 people
Tasks:
- Development of stored procedures, business services and UIs on an n-tier architecture
- Design and development of one of the application's input feeds, involving algorithmic transformations and partial data synchronization

Environment: .Net 3.5, C#, WinForms, WPF, SQL, WCF, Linq, UML 2.0, Visual Studio Team System 2008 (Team suite & TFS), SQL Server 2008, Windows Server 2003, Windows XP, Quality Center

01/2007 - 03/2010 **SNCF**: rail traffic - Villeurbanne (69)
Designer / Developer, SOGETI - ~3 years
Project: SIERRA - 30 people
Tasks:
- Development of stored procedures, business services and UIs on an n-tier architecture
- Design and development of one of the application's input feeds, involving algorithmic transformations and partial data synchronization
- Integration of a route calculation tool
- Software architecture maintenance and evolution
- Collaboration with the team on technical and functional topics

Environment: .Net 3.0, C#, WinForms, ASP.Net, SQL, CAB, WCF, UML 2.0, Visual Studio Team System 2005 (Team suite & TFS), CVS, SQL Server 2005, SSIS, PowerAMC 12, Together RC2, Windows Server 2003, Windows XP, Quality Center

11/2006 – 12/2006 **Sogeti**: internal project - Villeurbanne (69)
Designer / Developer - 2 months
Project: Sales management and staff directory - 1 person
Tasks:
- Development of the staff management intranet site

Environment: C#, ASP.Net, SQL, SQL Server 2005, Visual Studio 2005, Windows XP

10/2006 – 10/2006 **i-BP**: banking solutions - Lyon (69)
Tester, SOGETI - 1 month
Project: Regression testing for Equinoxe maintenance - 3 people
Tasks:
- Running regression tests on the customer onboarding scope

Environment: Test Director 8.2, Quick Test Pro 8, Windows XP

05/2005 – 06/2006 **France Telecom**: telecom operator - Lyon (69)
Analyst, SOGETI - 14 months
Project: Task Force Convergence - Transmission Network Management (GRT) - 16 people
Tasks:
- Making IS data reliable as part of a database convergence

Environment: IRONMAN internal application
